## Select Fieldtrip

### \_\_\_\_ Nest Weavers

Birds build nests for their young in spring from materials found in their homes or habitats. We will examine a nest built in a field habitat and try to find the building materials growing in the field. Comparing these materials to commonly found items in our homes, we will weave a bird nest “store” for you to hang for the birds in your backyard. Designed for ages 6 to 12. Take home materials: frame and weaving materials.

### \_\_\_\_ Pond Critters

Frogs live in ponds and so do fish, but what else? Let’s dip a net into the water and find out! We will collect samples into a pan to create a pond of our own. Using spoons and pipettes, we will select our favorite critters to jar, draw and identify. Designed for ages 6 to 14. Take home materials: net and paper guide to pond critters.

### \_\_\_\_ Forest Terrarium

Let’s walk to a forest and sit for a moment to enjoy the peace. What elements make up this special place in nature? We will find out together as we build our own forest habitat in a terrarium bottle you supply! Designed for 6 to 14. Take home materials: pebbles, soil, seeds, moss and plant.
